How do I group my LE speakers with other Google Assistant or Chromecast built-in speakers?

Joachim Ulbrich - 2020-11-13 - Multiple speaker setup

You can use the Google Home app to group speakers for synchronous music throughout your home.

Make sure that your mobile phone is connected to the same Wi-Fi network as your speakers.

To group speakers:

1.   Open the Google Home app .

2.   Tap Add > Create speaker group.

3.   Tap each device you want to include in the group.

4.   Enter a name for the group.

5.   Tap Save.

You can learn more about using Chromecast built-in at support.google.com/chromecast.
