Can I use Apple AirPlay 2 without setting up my speaker in the Braun Audio app and the Google Home app?

Joachim Ulbrich - 2024-01-17 - Setup and settings

To make sure the audio of your LE speaker is optimised and all connection modes are available, set up your speaker in the Braun Audio app and the Google Home app before using Apple AirPlay 2.

You can also set up the speaker to use Apple AirPlay 2 by accessing Wireless Accessory Configuration (WAC) in the settings of your phone.
